

Create or Update Contact via PUT

Created by	 Ankit Jain
Category	

1. Problem Statement / Use Case

Scenario: External HR system pushes employee data to Salesforce. If Contact exists (matched by Email), update it. Otherwise, create it.

2. REST Endpoint

```
PUT /services/apexrest/contacts
```

3. Apex Class

<https://github.com/techjourneywithankit/Udemy-Integration-TJWA/blob/main/force-app/main/default/classes/ContactRestService.cls>

4. Sample Request Body

```
{  
  "FirstName": "John",  
  "LastName": "Smith",  
  "Email": "john.smith@example.com",  
  "Phone": "555-0100",  
  "Title": "Software Engineer"  
}
```

5. Sample Response

Created:

```
"Contact created successfully. Contact Id: 003xx000004TMGQA  
A4"
```

Updated:

```
"Contact updated successfully. Contact Id: 003xx000004TMGQA  
A4"
```
