

Create Account via POST

Created by	 Ankit Jain
Category	

1. Problem Statement / Use Case

Scenario: External lead-capture website needs to send account names to Salesforce and create Account records automatically.

2. REST Endpoint

```
POST /services/apexrest/accounts
```

3. Apex Class

<https://github.com/techjourneywithankit/Udemy-Integration-TJWA/blob/main/force-app/main/default/classes/AccountRestService.cls>

4. Sample Request Body

```
{  
  "Name": "Acme Corporation"  
}
```

5. Sample Response

Success:

```
"Account created successfully. Account Id: 001xx000003DGXHA  
A4"
```

Error:

```
"Error: Account Name is required."
```
