

OAuth 2.0 - Auth Provider Flow

Created by	 Ankit Jain
Category	

Here are the official Google Calendar API documentation links:

Primary Documentation

Resource	URL
REST API Reference (main page)	https://developers.google.com/calendar/api/v3/reference
Events: list endpoint (what we use)	https://developers.google.com/calendar/api/v3/reference/events/list
OAuth 2.0 Scopes	https://developers.google.com/identity/protocols/oauth2/scopes#calendar
OAuth 2.0 Setup Guide	https://developers.google.com/identity/protocols/oauth2
OAuth Consent Screen Config	https://developers.google.com/workspace/guides/configure-oauth-consent

The Endpoint We'll Call

GET <https://www.googleapis.com/calendar/v3/calendars/primary/events>

Key Parameters:

- `calendarId = "primary"` (logged-in user's main calendar)
 - `timeMin = now` (RFC3339 format – only future events)
 - `singleEvents = true` (expand recurring events)
 - `orderBy = startTime` (chronological)
 - `maxResults = 5` (limit results)
-

Recommended Scope for the Course

<https://www.googleapis.com/auth/calendar.events.readonly>

→ "View events on all your calendars"

→ Minimum privilege for reading events

The Apex Code
